INTRODUCTION

- Managing campus events manually is time-consuming and inefficient
- Students often miss important event updates and registration deadlines
- Lack of a centralized platform creates confusion
- Organizers face difficulty in handling registrations and communication
- The system provides a digital solution for event management
- It allows easy event creation, registration, and tracking
- Improves communication between students and organizers
- Enhances overall campus engagement and efficiency

PROBLEM STATEMENT

- Event management in colleges is mostly manual or poorly organized
- Students do not receive timely information about events
- No single platform to view and manage all events
- Registration process is slow and error-prone
- Organizers struggle to manage participant data
- Communication gaps lead to missed opportunities
- Data is not stored properly for future reference
- Need for an automated, reliable, and centralized system

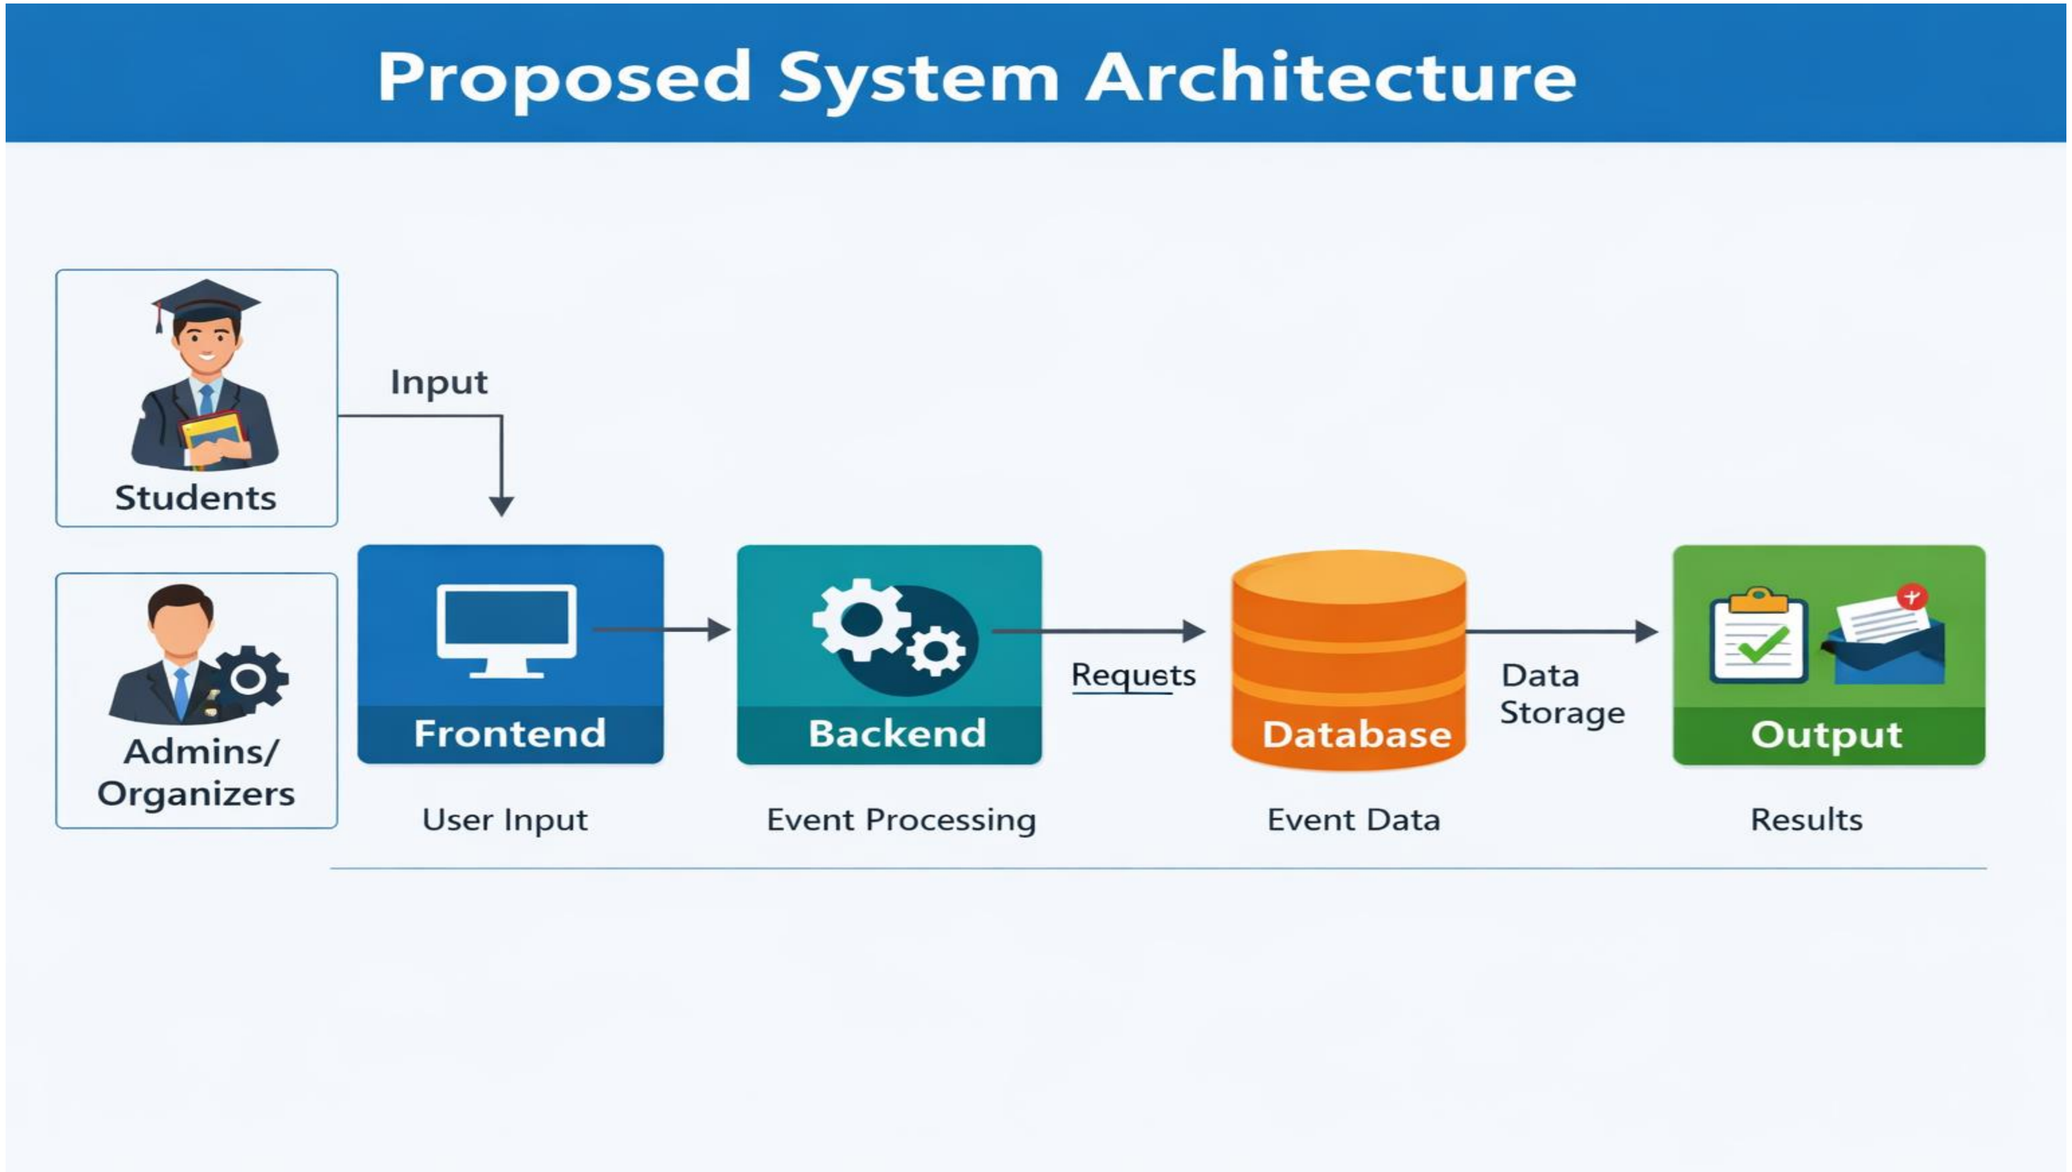
OBJECTIVE(S)

- To design and develop a Smart Campus Event Management System
- To implement an automated platform for event registration and management

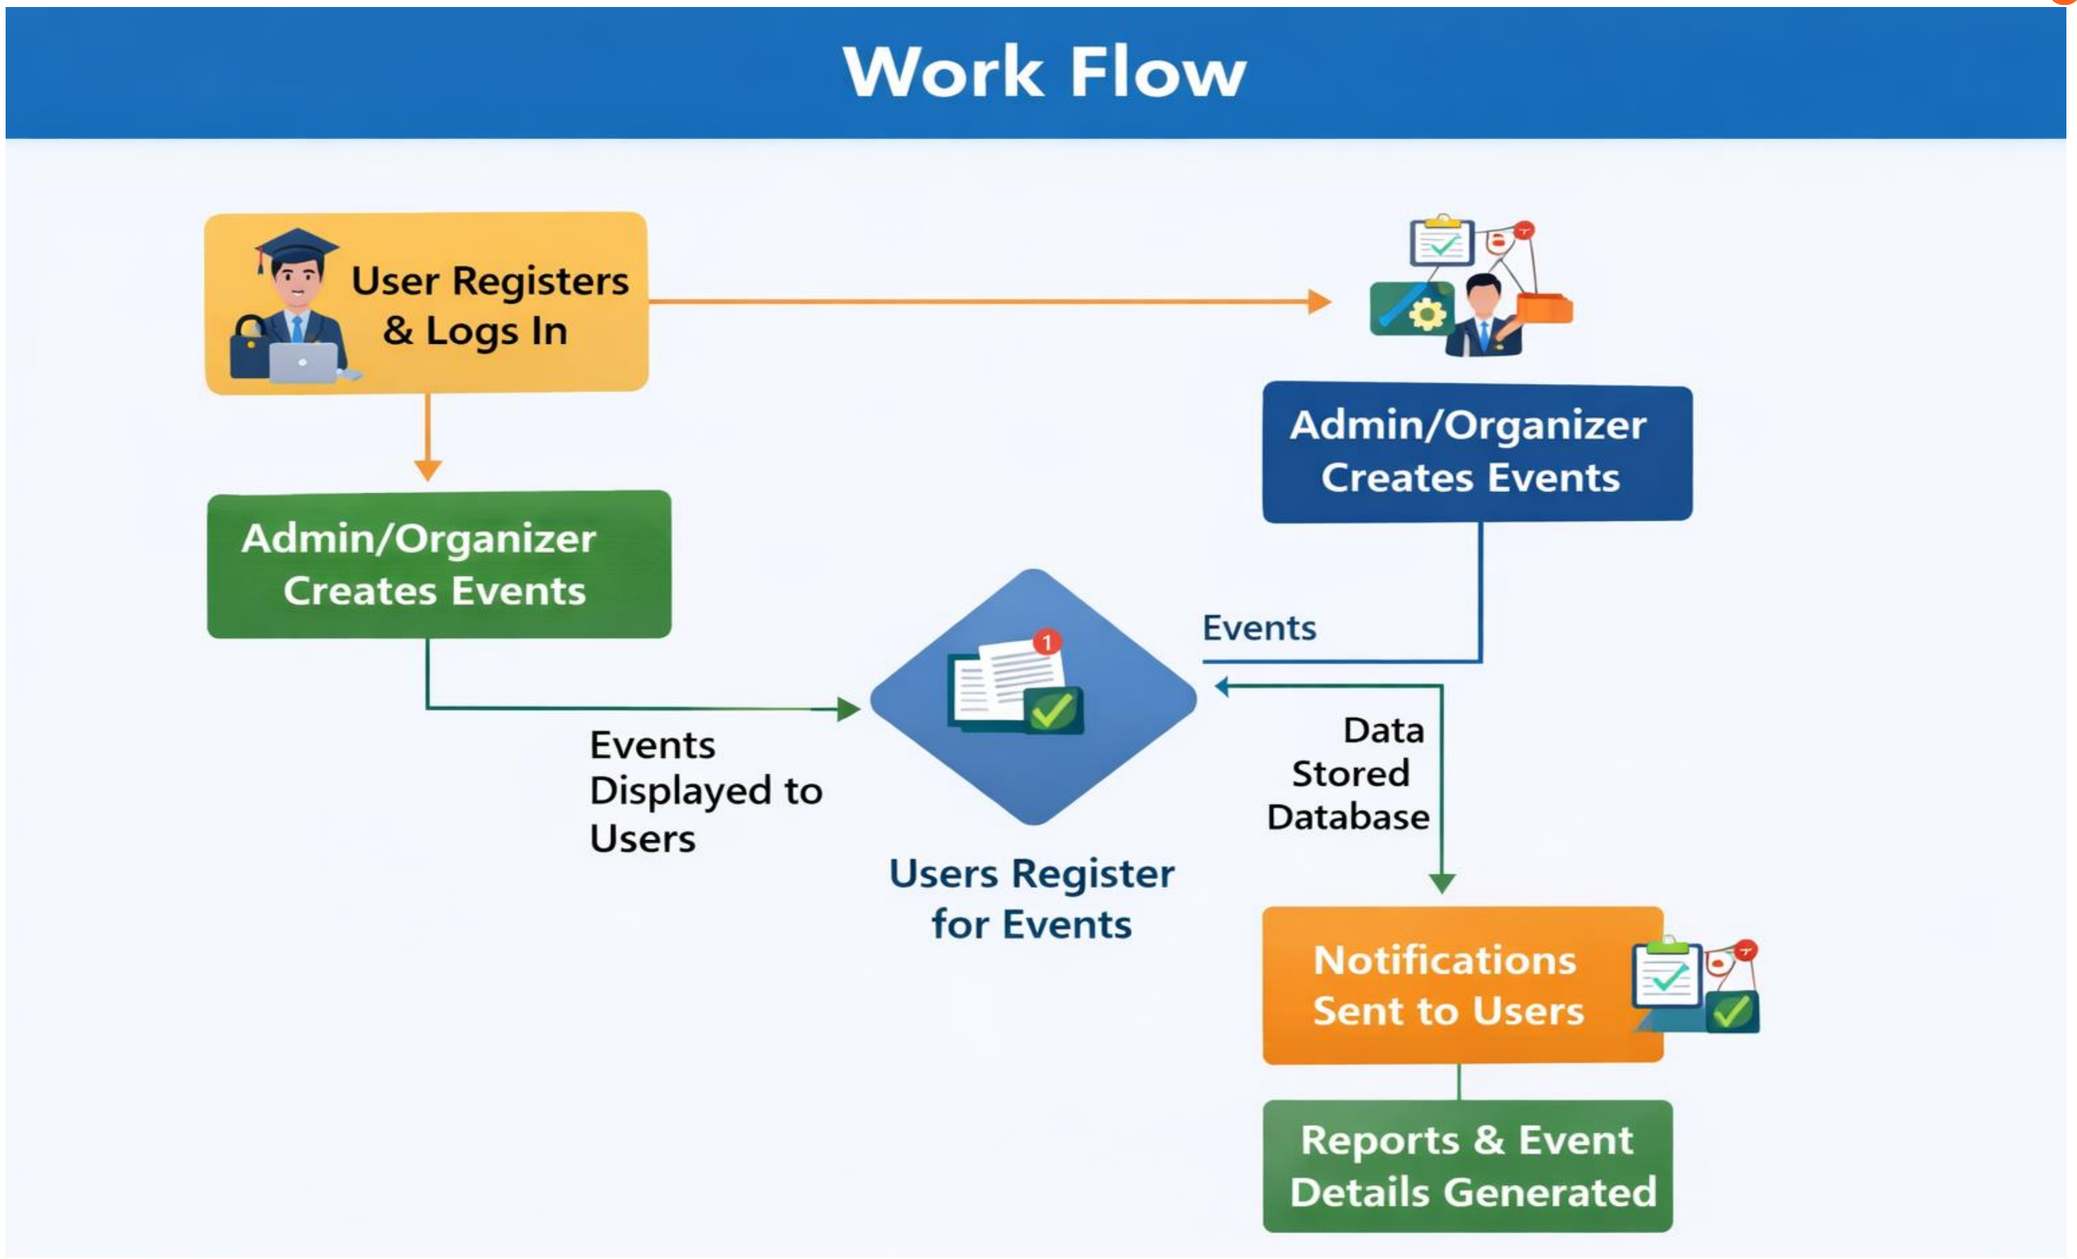
PROPOSED SYSTEM

- Provides a centralized platform for all campus events
- Allows students to view and register for events online
- Enables organizers to create and manage events easily
- Sends notifications and updates to users
- Maintains event records in a structured database
- Reduces manual work and paperwork
- Improves communication between students and organizers
- Provides user-friendly interface for easy access

PROPOSED SYSTEM ARCHITECTURE



WORKFLOW



Work Flow
User Registers & Logs In
Admin/Organizer Creates Events
Admin/Organizer Creates Events
Events
Events Displayed to Users
Users Register for Events
Data Stored Database
Notifications Sent to Users
Reports & Event Details Generated

TECHNOLOGIES USED

Frontend:
HTML, CSS, JavaScript

Backend:
Java (Servlets/JSP)

Database:
MySQL

Tools:
Eclipse IDE, Apache Tomcat

Hardware/Software Requirements:

- Computer with minimum 4GB RAM
- Java JDK
- Web browser

MODULE DESCRIPTION

Module 1: User Management
Handles user registration, login, and authentication.

Module 2: Event Management
Allows creation, updating, and deletion of events.

Module 3: Registration Management
Manages student registrations for events.

Module 4: Notification System
Sends updates and alerts to users.

IMPLEMENTATION SCREENSHOTS

ADVANTAGES & LIMITATIONS

Advantages:

- Easy to use and efficient
- Centralized system
- Saves time and effort
- Reduces manual errors

Limitations:

- Requires internet connection
- Initial setup cost
- Depends on system maintenance

Thank you
